

Bug 26762 - Modify template logic in opac-reserves.tt to avoid error

Before

- For the item where a hold cannot be placed there is no separator between it and the next item.
- The confirm hold button is not in line with the list (see next screen shot).

[Home](#) / [Placing a hold](#)

Confirm holds for: koha (42)

☒ Place a hold on [CGI programming with Perl /](#) , by Guelich, Scott.

Pick up location:

[Show more options](#)

[Programming the Perl DBI /](#) , by Descartes, Alligator.

There are no items that can be placed on hold.

☒ Place a hold on [Intermediate Perl /](#) , by Schwartz, Randal L.

Pick up location:

[Show more options](#)

☒ Place a hold on [Effective Perl programming :](#) , by Hall, Joseph N.,

Pick up location:

[Show more options](#)

[Confirm hold](#)

After

- There is a separator line between items.
- The confirm hold button is aligned correctly with the list.
